

Block ice machine - Focusun Ice Machine

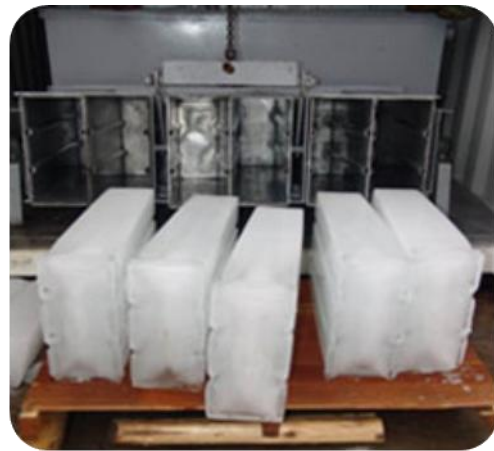

Focusun utilizes both direct refrigeration technology and brine refrigeration technology to meet your different requirements. The standard weight & size of block ice Focusun produces are listed in the form below. Focusun can also customize the size of the block ice to meet your needs and requirements.

Weight (kg/block)	Dimension (L×W×H mm)
5	120×100×460
10	155×100×700
15	185×125×700
20	245×125×700
25	315×125×700
50	480×160×700

Block ice has a large dimension but has small contact area so it does not melt easily. It is usually cut into different pieces for different uses in ice sculpture, sea shipping and fish vessels. The small pieces of block ice can be also be used for various purposes. There will be a little loss because the ice will thaw partly when crushed. Focusun offers both transparent and milky white ice for your preference.
