

## **Home > Flake ice machine > Containerized flake ice machine**

All equipment of the large capacity flake ice machine is installed in the container with other equipment, such as automatic ice storage, ice conveying system and so on. This equipment can form a movable ice-making station. A 40ft standard container can make a flake ice machine with maximum capacity of 60T/Day.

### **Equipment features**

- The integral installation makes equipment more compact and reasonable.
- It is more convenient for equipment to be transported, moved, installed and debugged.
- It can be used for outdoor places because of its stable structure.

The container is brand new and consists of two sizes - 20 feet or 40 feet. All containers comply with the ISO standard.
